A1: Mission statement

Team *'Team name'*

Which issue are you going to solve?

The need to reduce energy consumption and by that the emission of CO2

Combined the building and renovation of residential buildings and the private consumption of energy within private owned housing equals 80% of the overall energy consumption in Ukraine.

Mission Statement

Our mission is to reduce the energy consumption in Ukraine by 50% before 2030 by bringing together house owners, house owner associations, solution providers and governments to collaborate on new solutions, awarness and changing behaviour

What is the most important actions to focus on to succeed?

Reduce legislative barriers for implementing new energy saving technology

Make it financial attractive for both homeowners and suppliers to invest in energy reducing building and renovation

What is your measurable goal?

Reduce energy consumption by 50%

How would the dream scenario of succes look like?

Ukraine is known for being one of the most energy efficient nations in europe.
